

CHONDRO-PROTECTIVE FOR HORSES

EXTRA STRONG JOINT TREATMENT AND REGENERATION OF CARTILAGE AND TISSUES
7 ACTIVE SUBSTANCES IN EXTRA STRONG CONCENTRATION

ArtiVit Pegas Forte 7-700 g

Extra strong joint treatment for horses

Artivit® Pegas Forte 7 contains active substances that act synergistically crucial for the nutrition of joints. The powder form of the preparation makes it easy to administer, even if dosage is given for a long period. It can be added into feed or mixed with water.

It features five core mechanisms for the following benefits:

1. Nutrition of joints and joint capsules (glucosamine sulphate 2KCl and chondroitin sulphate)
2. Anti-inflammatory properties (MSM - methylsulfonylmethane)
3. Lubrication of joints and joint capsules (hyaluronic acid)
4. Restores damaged cartilage (hydrolysed collagen)
5. Pain relief (boswellia serrata)

Active components	4 g	1 kg
Glucosamine sulphate 2 KCl	1500 mg	375 g
Chondroitin sulphate	600 mg	150 g
MSM (methylsulfonylmethane)	1500 mg	375 g
Extract of Boswellia serrata	20 mg	5 g
Hyaluronic acid	10 mg	2.5 g
Hydrolysed collagen	280 mg	70 g
Vitamin C (L-ascorbic acid)	80 mg	20 g

Available in size 700 g

Recommended doses:

Therapeutic use (e.g., for acute conditions affecting locomotion or following orthopaedic surgery):

- Weight of up to 100 kg – 1 x 4 g/day (1 heaped teaspoon)
- Weight in excess of 500 kg – 1 x 20 g (2 tablespoons)

After the condition is somewhat alleviated or for preventive use, administer a half dose (a maintenance dose).
Recommended dosage periods: 3 months of use followed by a break of 2 months
